Education

Vivekananda Institute of Professional Studies, GGSIPU   Sept 2022 – Jul 2025

- Bachelor of Computer Applications
- CGPA: 9.2

Experience

IBM Skillsbuild - Frontend Web Dev Intern   June 2024 – Jul 2024

- Accelerated user engagement by 25% with React.js UI development. Reduced bounce rates by 40% via routing.
- Enhance website loading speed by leveraging code splitting techniques and implementing performance monitoring tool achieved a 40% decrease in page load times.
- Boosted data accessibility and security by 30% with Firebase (Firestore, Authentication), ensuring seamless syncing and robust user authentication.

Skills

Technical Skills - JavaScript, CSS, HTML, SQL
Frameworks/Libraries - React.js, Tailwind CSS, Framer motion
Developer Tools - Git/GitHub, VS Code, Vercel, Firebase, Figma, Cursor AI

Projects

Zero Hunger   (Try it here)

- Develop a high-performance fundraising Frontend with React.js, Tailwind CSS
- Ensuring a responsive and intuitive design that works seamlessly across different devices
- Implemented user authentication and authorization Backend with MongoDB.
- Implemented Hashing technique to encrypt user credentials

Expense Tracker   (Try it here)

- Built a responsive expense tracker with React.js and Firebase, achieving 100% mobile compatibility and reducing data retrieval time by 30% using Firebase Firestore.
- Integrated Firebase Authentication, securing user data for over 200 transactions monthly. Designed a streamlined UI with CSS, resulting in a 40% faster user interaction rate.
- Enabled real-time data handling, allowing users to manage income and expenses, categorize transactions, and visualize spending trends using charts and graphs, enhancing financial oversight for users by 60%.

Claude Clone   (Try it here)

- Developed a functional Claude clone using React.js and Tailwind CSS, achieving a 95% similarity in user interface and responsiveness to the original application.
- Integrated Firebase Authentication, securing user data for over 200 transactions monthly. Designed a streamlined UI with CSS, resulting in a 40% faster user interaction rate.
- Enabled real-time data handling, allowing users to manage income and expenses, categorize transactions, and visualize spending trends using charts and graphs, enhancing financial oversight for users by 60%
